OFFSHORE BILLING: MYTHS VS FACTS

**What You Think You Know About
Offshore Medical Billing Might Be Wrong...**

**Let's set the record straight — here are the
real facts behind the common myths.**

MYTH 1 : OFFSHORE BILLING MEANS POOR DATA SECURITY.

FACT

Top offshore billing partners (like Reenix Excellence) are **HIPAA compliant**, follow U.S. coding standards, and use encrypted systems to keep PHI secure.

Security isn't a compromise — it's a commitment.

MYTH 2 : OFFSHORE TEAMS CAN'T MATCH U.S. TURNAROUND TIMES.

FACT

With **24/7 operations** and time zone advantage, offshore teams actually **speed up claim** submissions and reduce A/R delays.

More coverage hours = faster reimbursements.

MYTH 3 : COMMUNICATION IS A CHALLENGE.

FACT

Dedicated FTE models ensure you work with **assigned account managers** and **daily reporting**, keeping communication seamless and transparent.

More coverage hours = faster reimbursements.

MYTH 4 : OFFSHORE BILLING SAVES COST BUT NOT QUALITY.

FACT

Certified medical coders (CPC, CPB) ensure **accuracy and compliance** — delivering better clean-claim rates and consistent ROI.

Quality and savings can coexist.

MYTH 5 : IT'S NOT SUITABLE FOR SPECIALIZED PRACTICES.

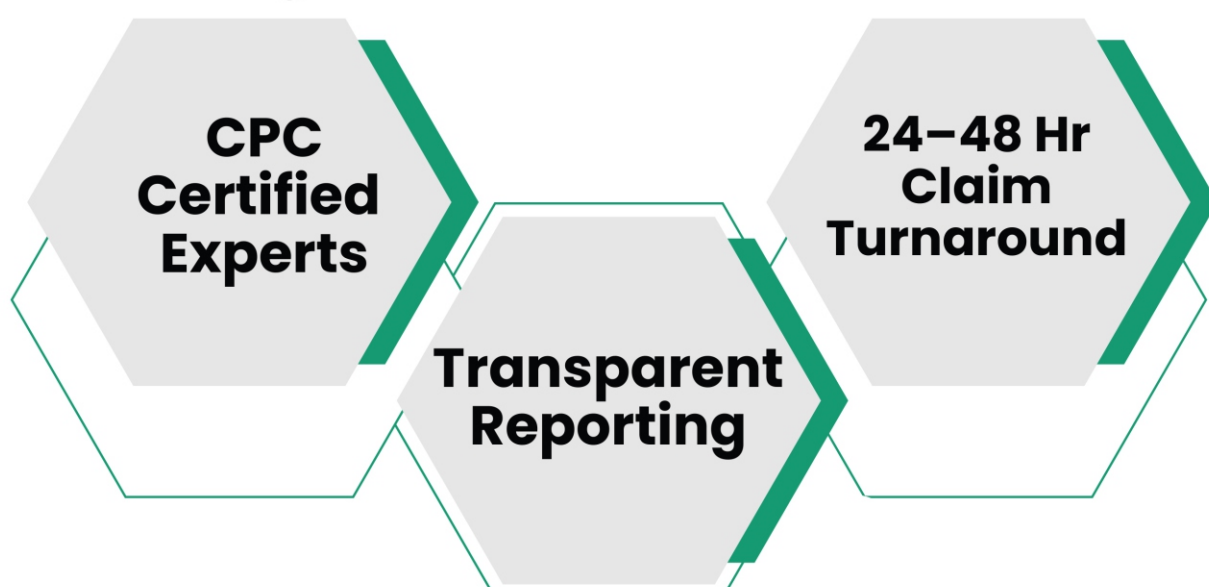

FACT

From **DME to Mental Health, ASC to SNF**, offshore billing teams are trained in specialty-specific codes and payer rules.

Expertise that scales with your practice.

**Partner with Reenix Excellence — the Offshore
Billing Team that Feels In-House.**

Let's simplify your revenue cycle today!
